Exclusive Sunshades

**Garden Art**  
FIRENZE

# GARDEN ART, THE JOY OF SHADE

Since 1985 GardenArt has been a **benchmark of excellence in sunshade solutions** offering impeccably elegant forms, highly-advanced frame designs and the highest quality materials.

Leader in Italy, the Florentine company GardenArt stands out globally for its **ability to create and develop innovative solutions**.

Our flagship product, the **Multivalvola® System**, has revolutionized the very concept of sunshades and has raised **wind resistance** standards worldwide.

To **satisfy your every need** in furnishing an outdoor area to offer protection from sunlight, we can help you choose the right model, size, color, materials, fabrics and finishes.

Our detailed craftsmanship is a guarantee of our **unmistakable Italian quality**. Creative engineering and skillful manufacturing unite to offer a carefully controlled production process every step along the way.

# SUNSHADE SOLUTIONS FOR YOUR EVERY NEED

Three families, thousands of solutions

In the name of quality, GardenArt combines tradition and innovation to create sunshades that are unmatched in terms of design, function and strength. The **Multivalvola® System** canopy can be applied to any of our models.

At the top of the range is our **line of Evolution sunshades made of mirror-polished stainless steel** offering a totally innovative touch. Ideal for swimming pools and solariums, these sunshades offer unparalleled design for the most **exclusive outdoor areas**. The single or double **Multivalvola® System** can be mounted on bases and supports built to meet functional and aesthetics needs.

An authentic GardenArt classic is our family of **small and medium-sized models**, with coverage ranging from 6 to 16 square meters. While **practical and elegant**, these sunshades boast essential but original features. Lateral or central support, made of either wood or metal, quadrangular or octagonal canopy.

For larger areas, up to 100 square meters, our sunshade solutions are **strong but compact**. Single, double or even quadruple canopies, supported by solid wood beams or high-quality iroko wood.

# CONTRACT

## Expanding outdoor accommodations

World-class solutions for restaurants, cafes, hotels, holiday farms, bed & breakfasts, guesthouses, spas & wellness centers and vacation resorts ...

Today, more than ever, the winning bid for any establishment is to provide a **comfortable outdoor area** for the greatest number of hours per day. Thanks to our wide range of sizes, shapes and colors, GardenArt's sunshades can be customized to meet the specific needs of any space. Capable of covering vast areas with just a few modular elements, our sunshades create an exclusive atmosphere combining elegance, safety and strength.

# HOME

## Make the most of your outdoor space

On your terrace, in your garden, or alongside your pool...

In any season, at any time of day, GardenArt's sunshades offer both protection from sun and wind, as well as privacy.

**Maximum comfort and ease of use** blend together to make these sunshades simply beautiful and incredibly stable.

# Advanced technology and superior materials

## Capote

### 1 COLORS

The range of colors available for canopies is extraordinarily wide, from classic and simple to bright and lively. The finishing edges of the Classic canopy or each layer of the **Multivalvola® System** canopy can be made in the same color as the canopy or in a different color to create contrast.

### 2 FABRICS

**GardenArt's** weatherproof and easy to maintain fabrics are made from the highest quality materials.

**Tempotest® by Parà** is a 100% waterproof acrylic fabric treated with Teflon, both stain and mildew resistant. This fabric guarantees long-lasting color that can weather any storm.

**Soltis Air® by Ferrari** is a micro-aerated, pre-tensioned polyester fabric, both non-deformable and tear-resistant. This fabric blocks UV rays while evacuating heat, offering exceptional outward visibility.

**Sunacryl® by Dickson Sunbrella** is an acrylic fabric treated with Cleangard, a special coating composed of fluorine nano-molecules. This fabric ensures long-lasting colors and extraordinary resistance to water, tearing and dirt.

### 3 FRAME

The rods are made of anodized aluminum which is both solid and lightweight. They can be oxidized silver or painted leather grinz.

## Struttura

### 4 SUPPORT

The supports for our sunshades are designed with the most reliable materials available: solid wood, lamellar iroko, anticorrosive painted tubular metal, anodized aluminum, mirror-polished AISI 316L stainless steel.

### 5 BASE

In addition to the classic cement-grit base, we also offer solutions with grounded metal backing or with save-spacing wall-mounted brackets (only available for certain models).

## Accessories *(available for certain models)*

- > Additional protective cover available in the same color as the sunshade, with a zipper, made of acrylic or Unimarine fabric.
- > Winches with stainless steel mechanism and protective casing, satin or mirror-polished versions available.
- > Revolving base with manual lever to rotate support and canopy.
- > Vertical shade to increase privacy and provide shade even when the sun is low.
- > Velcro edging allows for two or more sunshades to be connected to each other to create a single space.

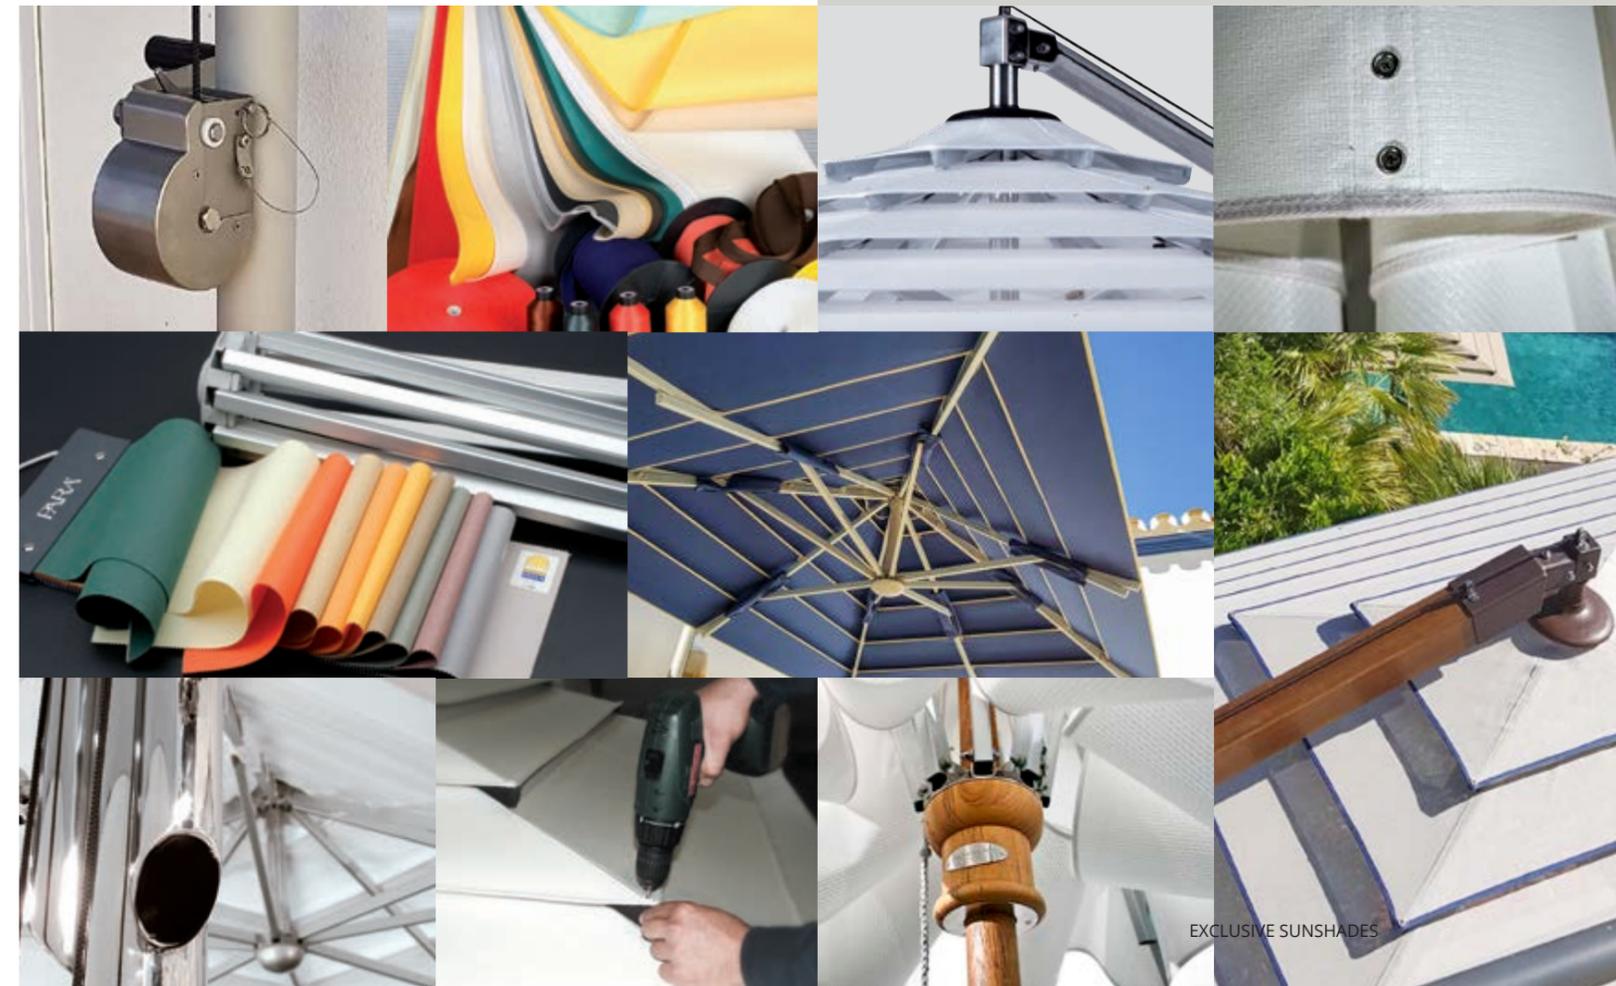

# Customization

**GardenArt** guarantees detailed personalization on all models, which may vary in terms of height, canopy size, materials used for the support structures and types and colors of fabric. Endless **freedom of choice** that makes each creation unique.

We assist our clients every step by step, from choosing the most suitable solution to meet specific needs to post-sales assistance and maintenance.

Our production phase is monitored at every step along the way: from choosing the right materials and assembly, to adding on the finishing touches and quality control.

# MULTIVALVOLA® SYSTEM

Putting a new spin on wind, **GardenArt** is proud to offer its very own, exclusively patented **Multivalvola® System** canopy.

The **Multivalvola® System** can be applied to any of our models. The special flaps and the innovative canopy fabric with overlapping concentric rings reduce the “sail effect” by allowing air to pass through.

Thanks to this innovative solution, not only is the sunshade increasingly stable even in the event of strong winds, but the warm air is channelled out through the canopy’s flaps offering more ventilated shade.

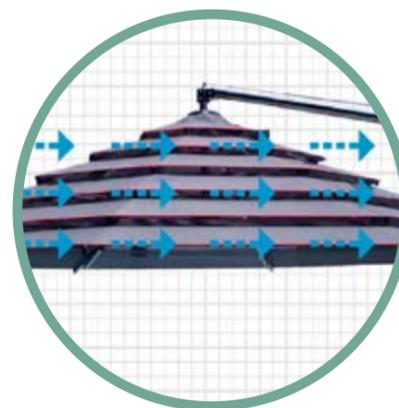

## CLASSIC Canopies

All our canopies are optimized to meet specific requirements for both private and professional use.

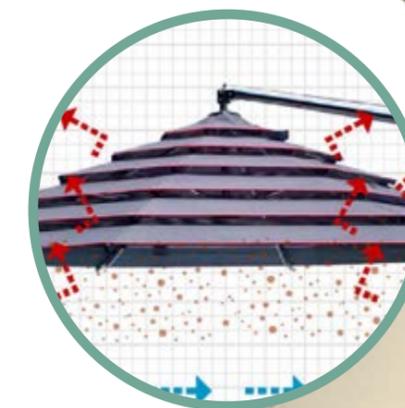

The inimitable design of the Classic canopies redefines tradition in the name of elegance.

The tensioned fabric and raised valve, combined with the sturdy structure and high-quality materials, ensures excellent wind resistance.

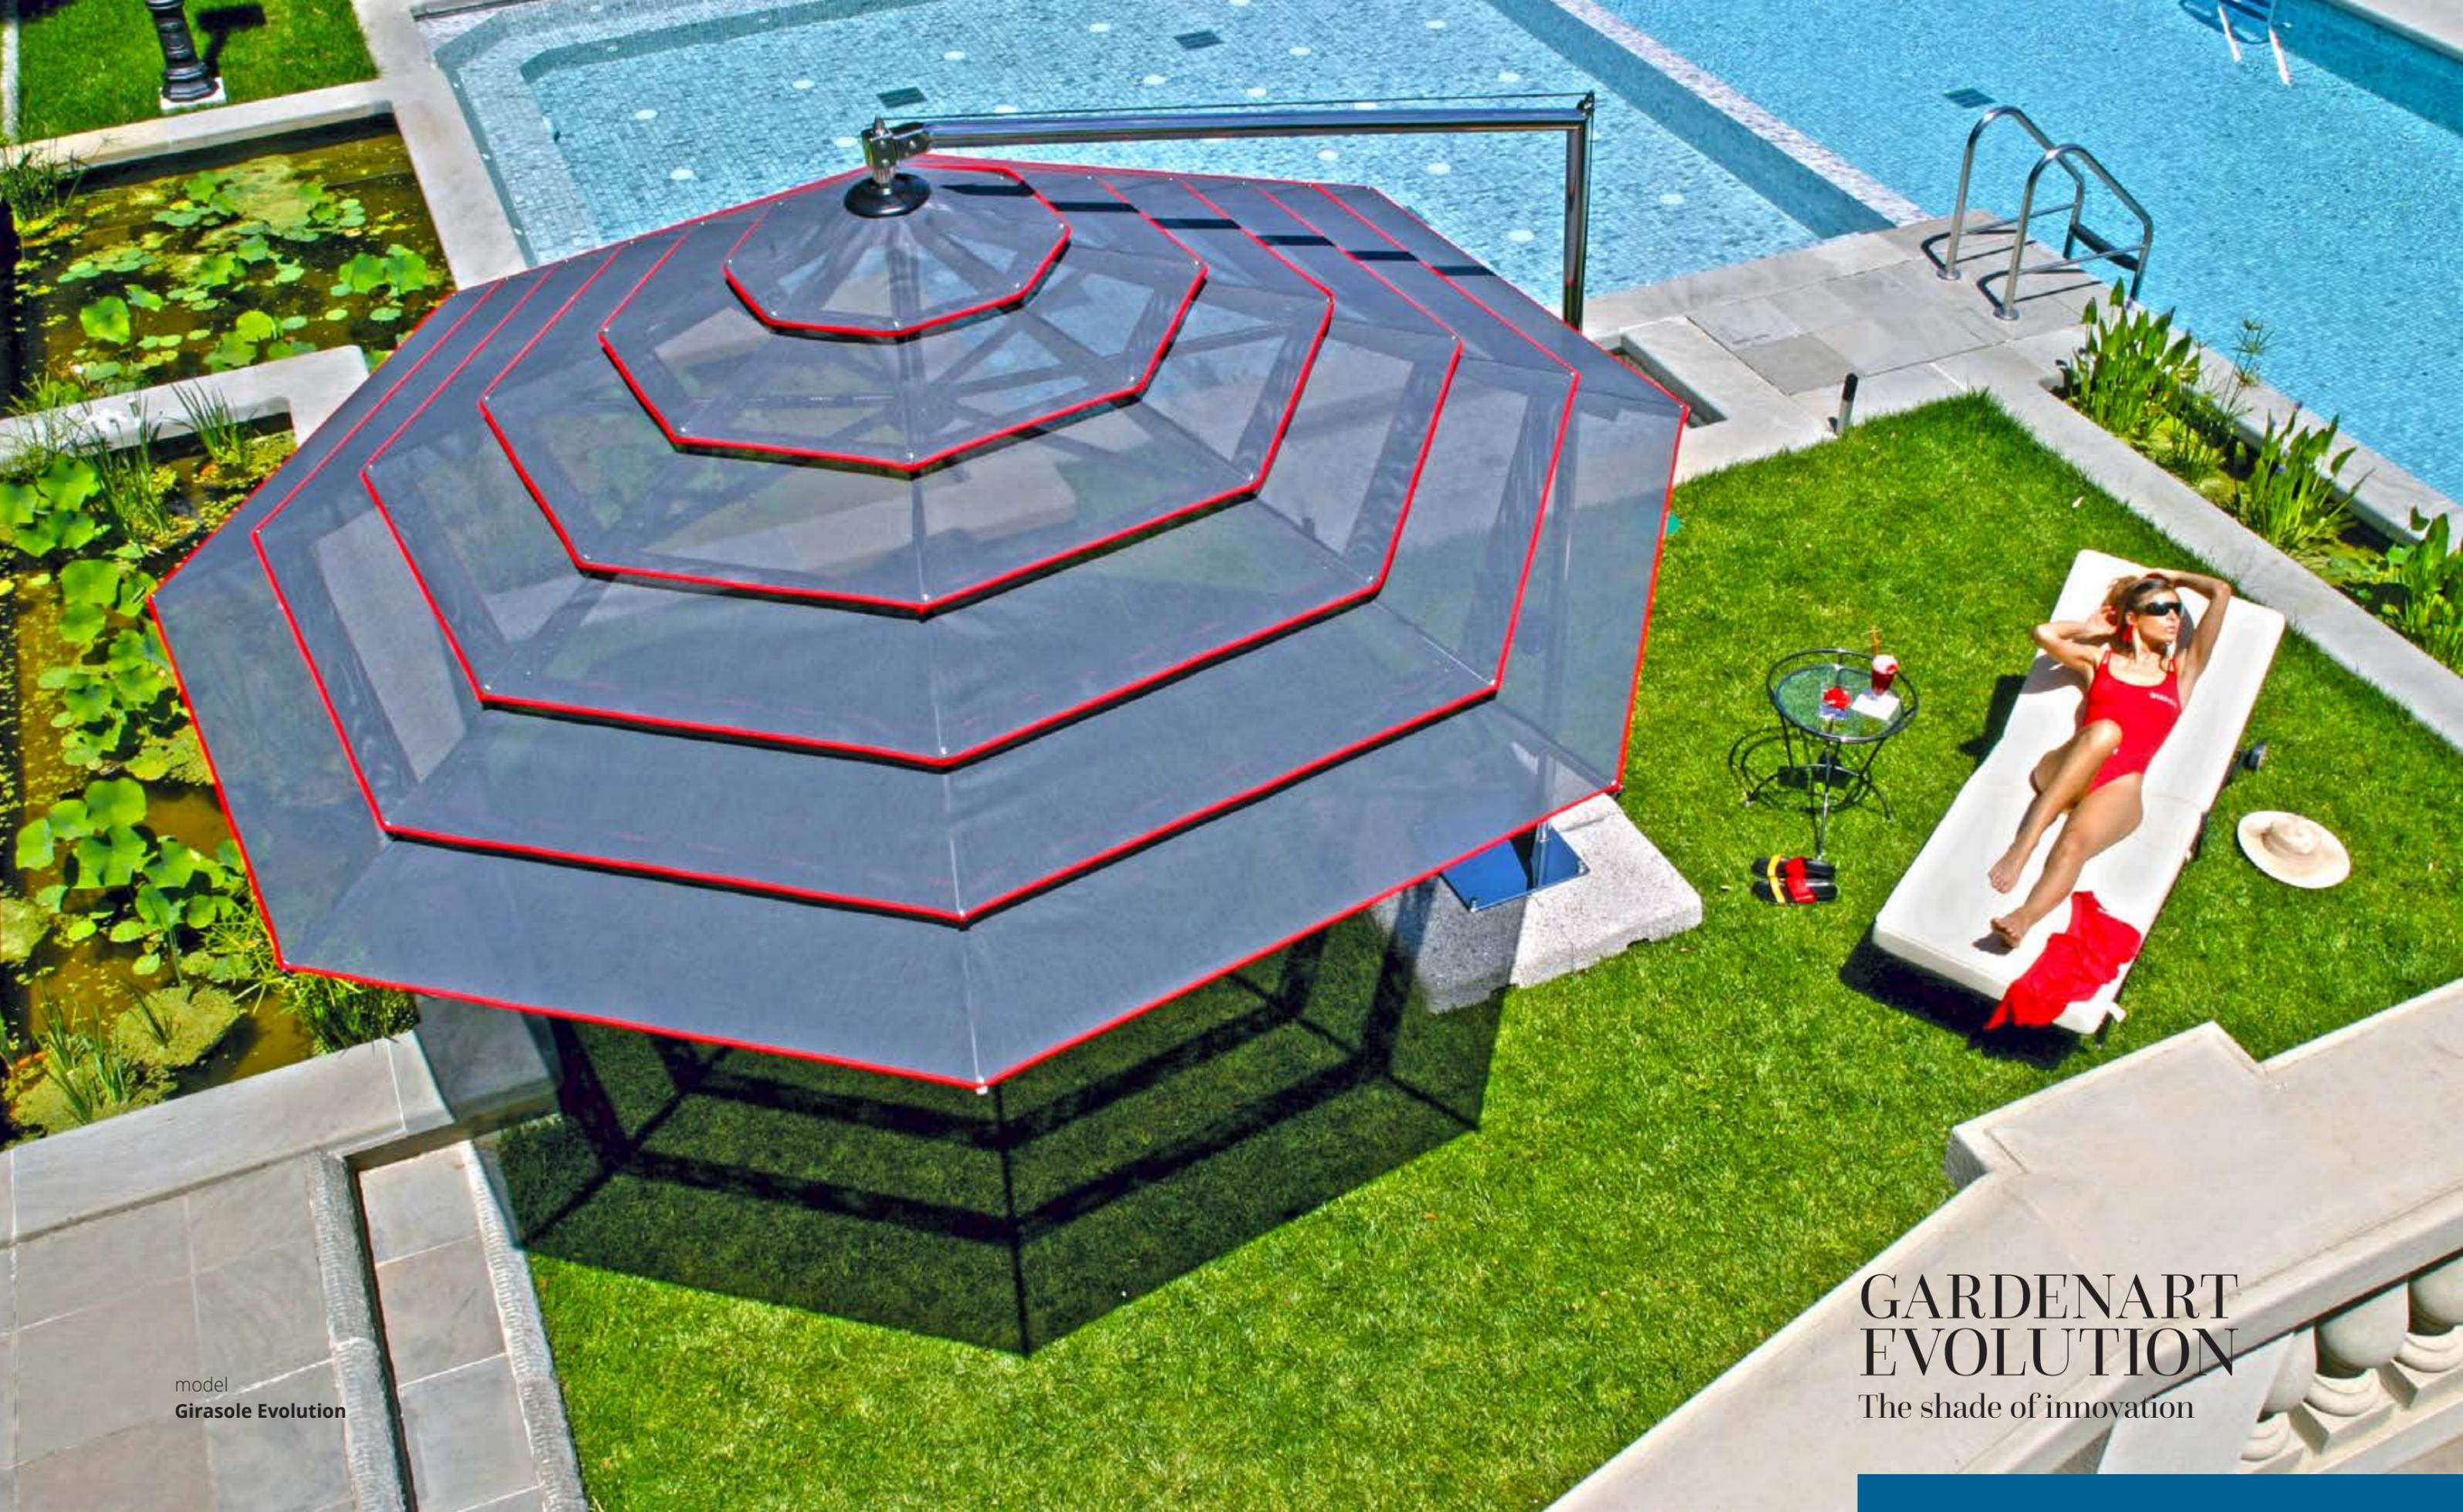

To increase the shaded area a perimeter valance can be applied to the sunshade.

**The wind can flow through the flaps of the canopy**, opposing wind thrust. This provides the sunshade with **unmatched stability**.

The **hot air** that tends to form under the sunshade **is freely released**, guaranteeing **even cooler** and more relaxing shade.

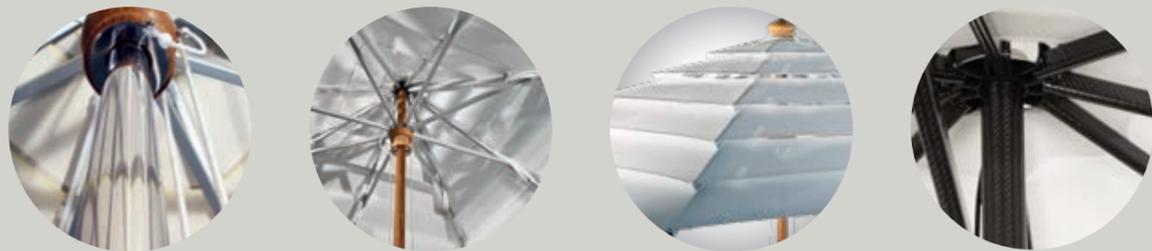

model  
**Girasole Evolution**

**GARDENART  
EVOLUTION**  
The shade of innovation

# POKER EVOLUTION

The irresistible Poker Evolution with the Multivalvola® System canopy is our most classical sunshade supported by a central pole made of mirror-polished stainless steel. Both essential and modern, with its highly innovative design, this sunshade is perfect for swimming pools and prestigious environments.
